

## TESTIMONIALS FOR CHILDLESS MOTHERS ADOPT

"2012 is going to be bigger for Childless Mothers than anyone has even imagined. The world is so ready for this and I just feel something deep within all of us brewing... percolating... and fermenting into a fine elixir of great meaning"

"I feel CMomA's power and potential to shift the lives of so many. It's like dropping a rock into the still water and watching the rings move outward, ultimately leaving no part of the water's surface untouched. I think this project will leave no part of the human experience untouched, for all those who participate, or partake, or read, or watch, or listen.

"This is the new evolution of consciousness, as the feminine energy comes into power to heal the planet.... this is such a beautiful manifestation of this!"

"Marcy Cole is leading the charge for women who have not experienced motherhood first hand but have a genuine desire to nurture children and be a loving leader for future generations. Brilliant, needed, and game changing!"

"CMomA is a pioneering project– and there are women out there right now who don't know it yet but they've got support/comfort/options heading their way because of what you are spearheading. I love it. And, when it's official and you've got that "Donate" Button on the web site, I can't wait to click it."

"This is an incredible vision that has the potential to change the world. I know that is a mighty big statement to make but in this case it's fitting. This has the potential to not only change the lives of the women and children involved but to also have a ripple effect that inspires others around the globe to follow suit, or perhaps inspire related acts that result in a win-win for the planet. It's that big and that profound".

"I have chills over this. It's going global. This will heal so many hearts."

“WOW I have goose bumps over this vision...I can't wait to go on this journey with you!”

“The pain childless mothers go through...and for me...that huge grappling need for that special conversation, acknowledgement, support, matched with the need of those beautiful children out there ( who are considered not as "desirable" ) waiting for all of us ... is what differentiates us and makes this vision IGNITE!”

“Just wanted to say THANK YOU for organizing an extraordinary gathering around a subject that is incredibly near and dear to my heart. What you actually helped me understand is that I need to talk and process it way more than I have been.”

“Though I myself have never felt a call to have children, I can instantly empathize and connect with the depth of that emotional pull a woman can feel to have a child, to express herself as a mother, and for the children likewise to feel the presence of the mother-energy in his/her life. It is simply essential!”

“Children are our future. They die of starvation everyday. We need to focus on saving them. They will be the ones who will save our planet.”

“No other Non-Profit is doing this. This is a cultural phenomenon and will have a powerful international impact.”
